

Raindance® Showerpipe

hansgrohe

# Raindance® Connect, the perfect overhead shower for upgrading your bathroom

Pictured actual size

Long shower arm 58 cm  
(Centre of overhead shower at 46 cm)

Overhead shower:  
Extra large, flat spray disc, diameter 240 mm,  
for expansive shower rain that envelops your  
body directly from above. Shower fun XXL with  
innovative AIR function which mingles water  
and air so that the shower spray becomes a  
soft shower rain.

Short shower arm 47 cm  
(Centre of overhead shower at 35 cm)

#### Easy to install:

To secure the Showerpipe, just drill into the grout – you don't need to drill into the tiles. Simply remove the old shower (with the wall bar, if necessary) and replace it with the Showerpipe. Ideal for rental homes – when you move house, just detach the shower system and take it with you, and fill in the holes.

#### Wall clearance:

With two different shower arm lengths, the Showerpipe also fits small shower cabins and even bathtubs. Use the ruler on the right to check that the overhead shower will be sufficiently clear off the wall to fit the dimensions of your bathroom.

### Water bearing wall bar:

Practical: Fixed to the wall, the shower bar also functions as a water pipe – overhead shower fun with no concealed installation required.

Water travels up to the overhead shower inside the shower bar when you put the hand shower into the Rain Connector.

### How much wall clearance is right for you?

Open up the brochure and hold it against the wall of your shower or bathtub. Open out the top three pages towards you at a right angle. The ruler shows both total clearances (max. 47 cm and 58 cm). N.B.: Allow sufficient clearance at the front and back so that you are free to move around under the overhead shower. Ideally, the centre of the overhead shower should be in the centre of the shower or bathtub.

Place against the wall and fold towards you along the line.

#### Chrome shower support:

The height and inclination of the top-quality, all-metal support are adjustable, so it suits anyone, no matter how tall or short they are, or what type of shower they prefer. Tip: Set up sideways, the hand shower becomes a shoulder shower, so you don't have to get your hair wet when showering.

#### Hand shower:

The cylindrical hand shower not only fits your hand perfectly, it also applies a powerful shower spray to the skin. Its shape blends perfectly with the classical look of the Showerpipe. The key, however, is hidden inside – an integrated coupling that guides the water into the shower bar.

What is your favourite way to take a shower?

function

Isiflex® 'XXL shower hose:  
Easy-clean metal-look. With a faster  
flow rate than a normal shower hose,  
it guarantees the ultimate in overhead  
shower fun.

**Rain Connector®**

Simply brilliant: Plug the hand shower into the Rain Connector to activate the overhead shower - without diversion, the water is automatically directed through the wall bar.

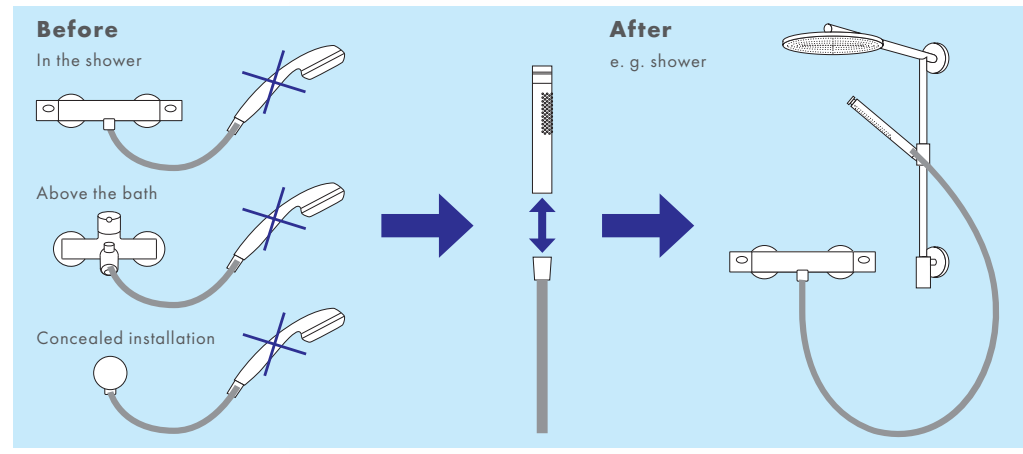

**Suitable for all existing shower connections.**

Fits anywhere:  
It is in the shower or the bathtub, Raindance Connect fits any existing shower connection. It's easy to install, whether you are renovating or building a new home.

**Get connected. Raindance®**

**Connect** the fastest connection to a large rain shower. No time-consuming reconstruction – simply remove the old hand shower and screw Raindance Connect to the wall. With a simple click, the hand shower becomes an overhead shower! From a wide and central overhead area, the water pours down onto head and shoulders. Raindance Connect fits into any bathroom and can be used wherever a hand shower is already installed. Its clear, puristic design makes it a real eye-catcher. When are you going to get connected – to Shower Fun XXL?

Pictured actual size

Raindance® AIR 240 Overhead shower:  
This extra-large, flat spray disc with a diameter of 240 mm creates expansive shower rain that enrobes your whole body directly from above. Shower fun XXL with the innovative AIR function.

Straight shower arm:  
Its elegant straight line also saves space by avoiding the typical bow shape.

Wall bar with integrated pipe:

The water travels to the top inside the shower bar – a brilliant feature that makes it possible to retrofit an overhead shower without having to use a concealed fitting.

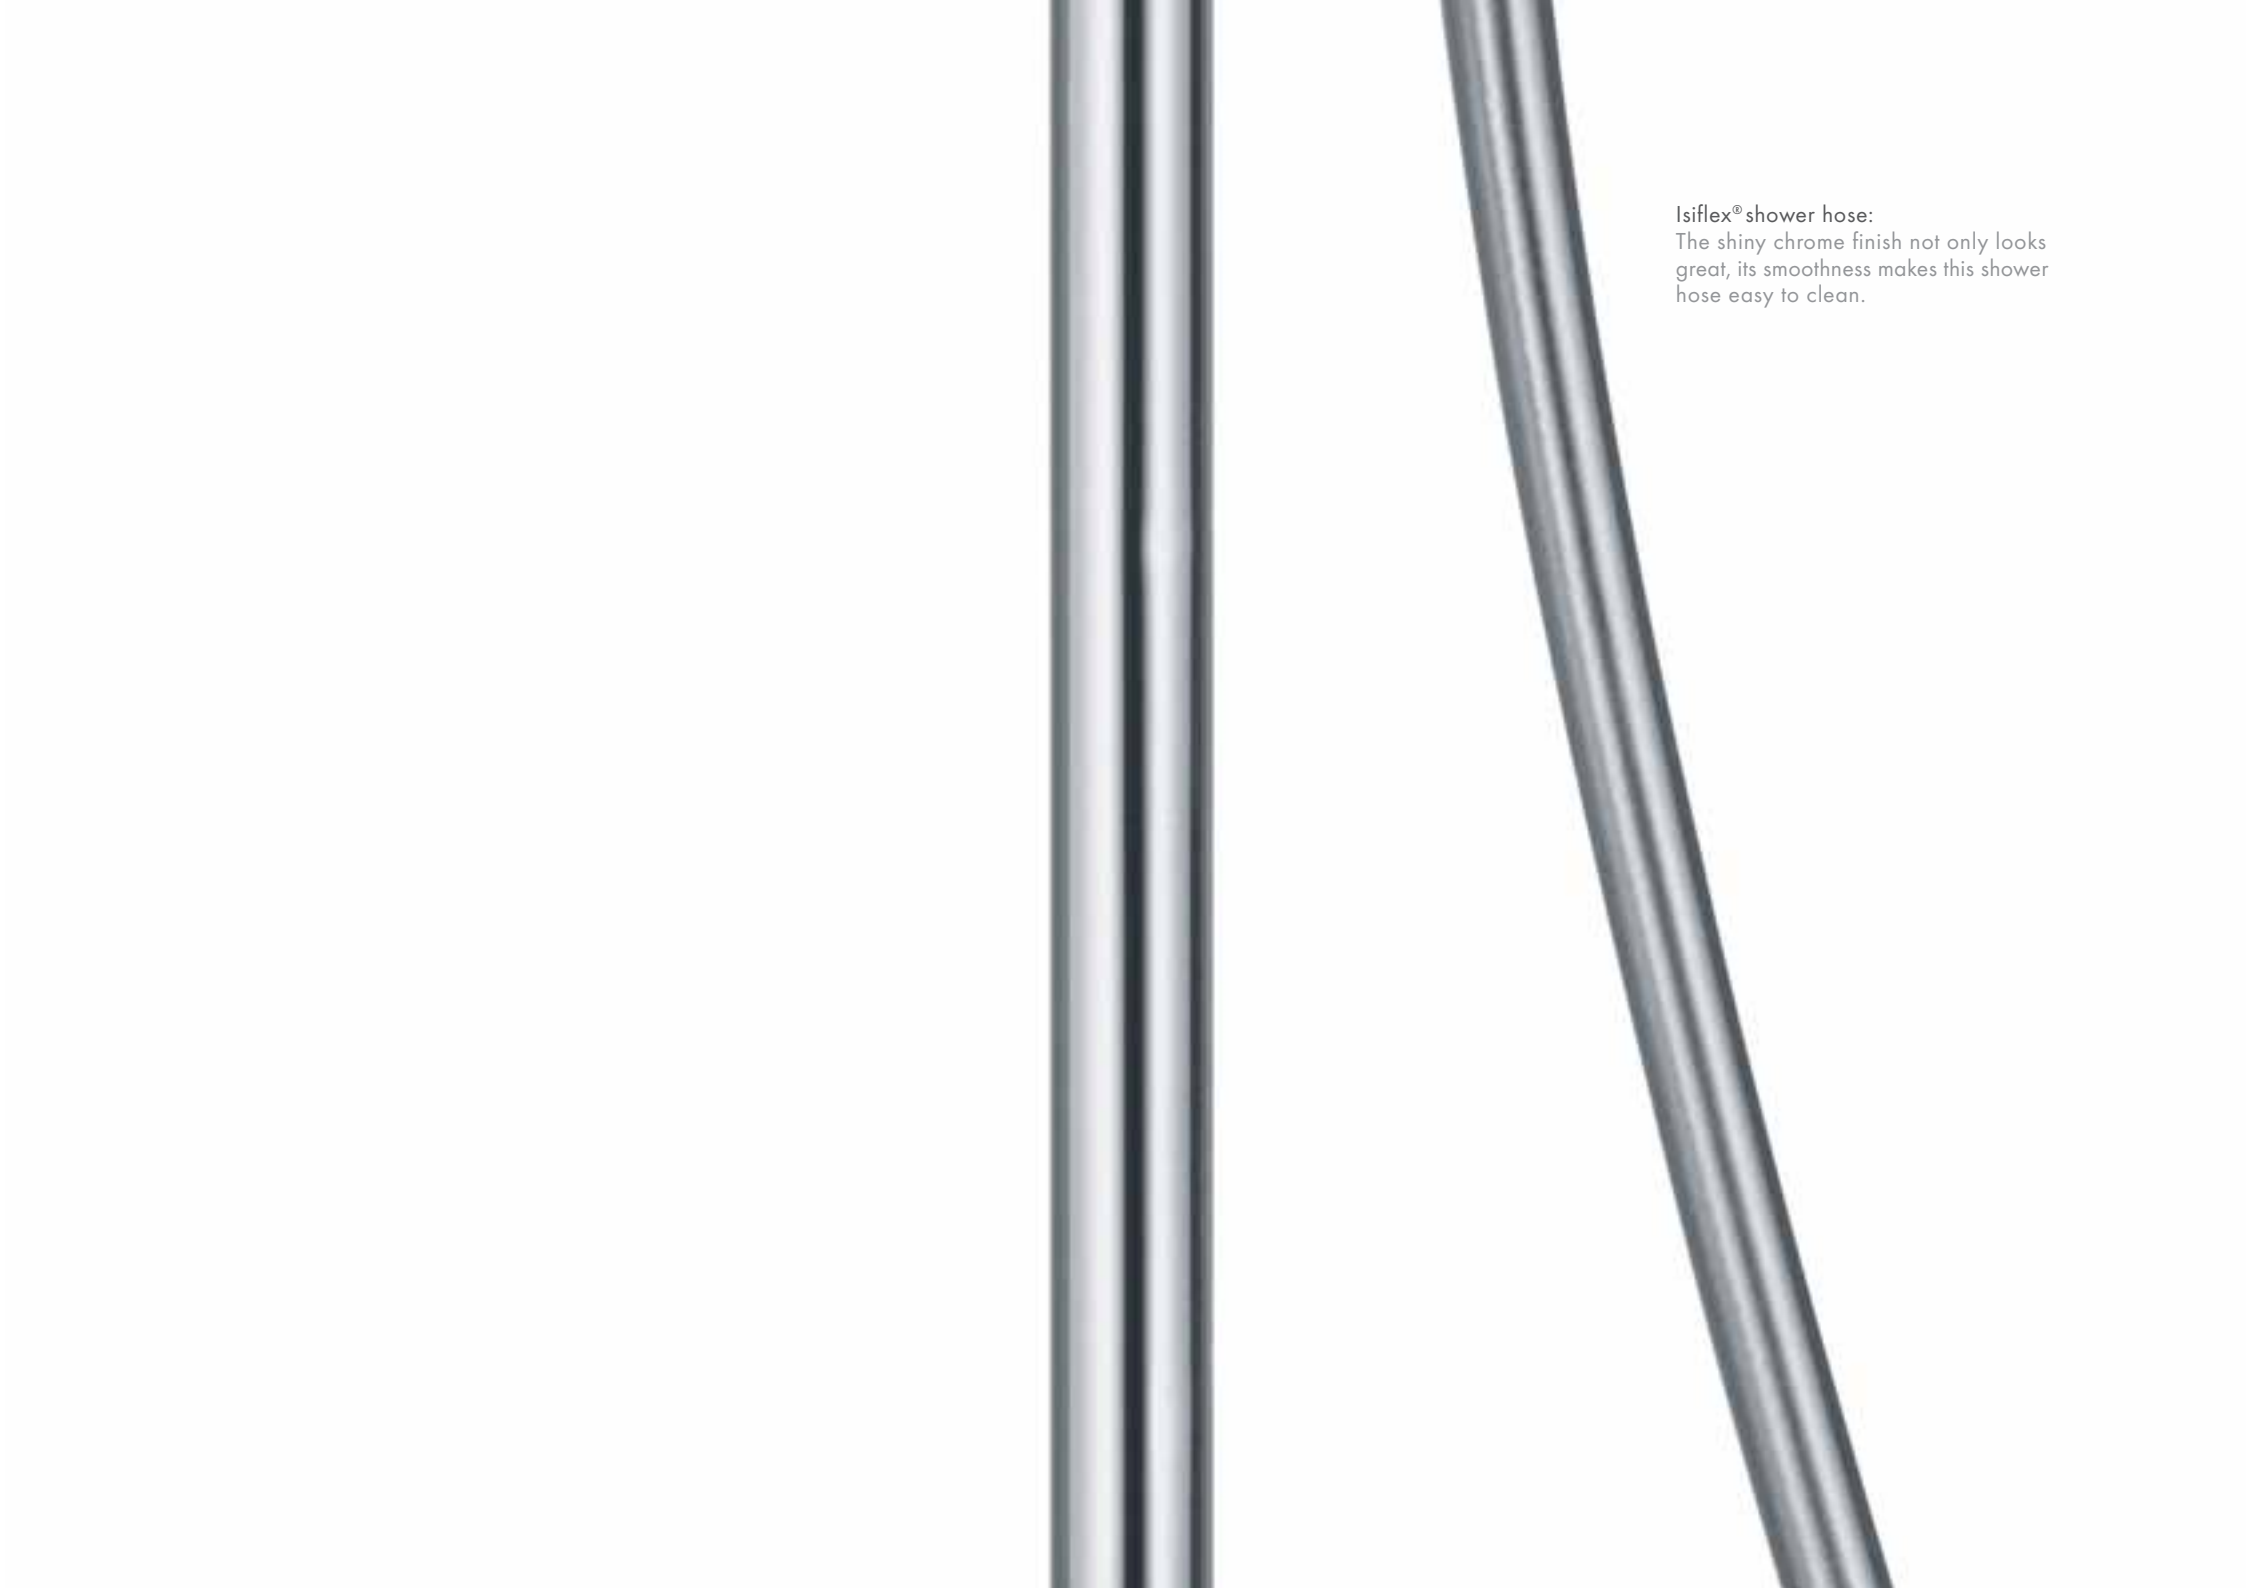

Raindance® S 100 AIR 3jet Hand shower:  
Innovative in form and function, with three  
different spray modes and AIR function.

Chromed shower support:  
High-quality, durable all-metal support  
with an ergonomic pin handle so you  
can position the shower head at any  
height.

Isiflex® shower hose:  
The shiny chrome finish not only looks  
great, its smoothness makes this shower  
hose easy to clean.

Retrofittable thermostat with integrated shut-off and diverter valve:

Convenient operation with fast, accurate temperature setting and combined hot water stop at 38 °C. Integrated switch from overhead shower to hand shower with diverter stop to avoid accidentally wetting your hair.

**Powered by AIR.** At Hansgrohe every drop counts. Impressive proof of this is the latest technological innovation – AIR, from now on used in all Raindance showers. Mixed with air, the out-flowing water becomes softer or harder, depending on the spray mode – and the daily shower becomes a feast for the senses. For your eyes: You can truly see the enclosed air in the voluminous drops. For your ears: Like a shower of rain, the AIR sound has a calming

as well as vitalising effect. And for the skin, our largest and most sensitive sense organ: The water enriched with air completely enrobes the body in a pleasant layer of water and air. „Powered by AIR“ – with this unique technology Hansgrohe creates new shower quality and sets a new shower standard. Mixing it with air reduces water consumption by circa 10 % and improves the quality of the spray jet – even at low water pressure.

Let me count the ways.... Water is many-faceted. It can caress and pamper, but also massage and awaken. The innovative AIR technology makes the most of this diversity in new, different spray modes. The choice is yours: With Rain AIR, the softly flowing water becomes even gentler, and large voluminous drops of air make it seem even softer. The simple act of showering becomes a

moisturising skin care treatment. Whirl AIR is quite different: here, the air accelerates the jets of water to an intense massage experience – millions of tiny impulses giving your body new energy. Balance AIR, on the other hand, offers a pleasant mix of soft shower rain and a strong jet of water – ideal for rinsing your hair, for example.

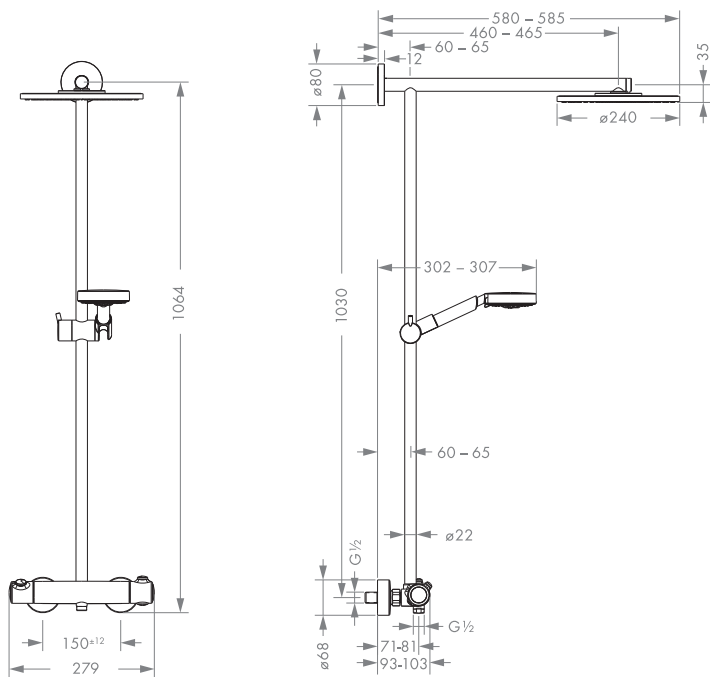

Whirl AIR: here, too, water is mixed with air. In a very small space, the air is compressed and the outflowing massage jet accelerated. The result is a very powerful, intense massage.

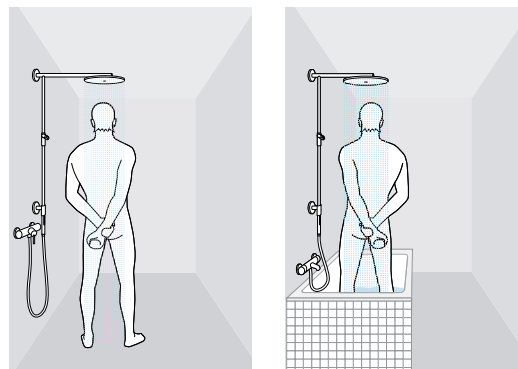

Rain AIR: air is drawn over the whole shower head and mixed with the inflowing water, 1 litre of water combining with round 3 litres of air! The drops of water become larger, lighter and softer.
